

ANTON ALYAKIN

alyakin314@gmail.com \diamond alyakin314.github.io

319A Clark Hall, 3400 North Charles Street, Baltimore, MD, 21218

EDUCATION

Washington University in St. Louis <i>Medical Scientist Training Program</i> Biomedical Informatics & Data Science	[Aug 2021, May 2029] (Expected)
Johns Hopkins University <i>Master of Science in Engineering</i> Applied Mathematics & Statistics	[Jan 2019, Dec 2019]
Johns Hopkins University <i>Bachelor of Science</i> Computer Science Applied Mathematics & Statistics	[Aug 2015, May 2019]

RESEARCH

Johns Hopkins University <i>Assistant Research Engineer</i> Department of Applied Mathematics & Statistics Faculty Supervisors: Carey E. Priebe & Joshua T. Vogelstein	[Jan 2020, Mar 2021]
Johns Hopkins University <i>Graduate Research Assistant</i> Department of Applied Mathematics & Statistics Faculty Supervisor: Carey E. Priebe	[Jun 2019, Dec 2019]
Johns Hopkins University <i>Undergraduate Research Assistant</i> Department of Computer Science Faculty Supervisor: Suchi Saria	[May 2017, May 2019]

TEACHING

Johns Hopkins University <i>Teaching Assistant</i> 580.475 Biomedical Data Science 553.430/630 Introduction to Statistics 553.436/636 Data Mining	<i>Fall 2019</i> <i>Spring 2019</i> <i>Fall 2018</i>
--	--

THESES

1. **A. Alyakin**, *Robust Hypothesis Testing of Location Parameters using Lq-Likelihood-Ratio-Type Test in Python*, a thesis submitted to The Johns Hopkins University in conformity with the requirements for the degree of Master of Science in Engineering, 2019. [library] [arXiv] [code]
2. **A. Alyakin**, *Motif Discovery in the Irregularly Sampled Time Series Data*, a thesis submitted to The Johns Hopkins University in conformity with the requirements for Senior Honors Thesis in Computer Science, 2019.

PUBLICATIONS

1. J. Chung[†], B. Varjavand[†], J. Arroyo, **A. Alyakin**, J. Agterberg, M. Tang, J. T. Vogelstein, C. E. Priebe, *Valid Two-Sample Graph Testing via Optimal Transport Procrustes and Multiscale Graph Correlation with Applications in Connectomics*, accepted for publication, Stat, 2021. [arXiv]
2. K. Marchisio, Y. Park, A. Saad-Eldin, **A. Alyakin**, K. Duh, C. Priebe, P. Koehn, *An Analysis of Euclidean vs. Graph-Based Framing for Bilingual Lexicon Induction from Word Embedding Spaces*, accepted for publication, Findings of EMNLP, 2021.

PREPRINTS

1. M. Powell, C. Clark, **A. Alyakin**, J. T. Vogelstein, B. Hart, *Metformin: We Need to Either Put It in Our Drinking Water or Rethink How We Study It*, submitted, 2021. [arXiv]
2. **A. Alyakin**, J. Agterberg, H. Helm, and C. E. Priebe, *Correcting a Nonparametric Two-sample Graph Hypothesis Test for Graphs with Different Numbers of Vertices*, submitted, 2020. [arXiv] [code]
3. F. Rahman, N. Finkelstein, **A. Alyakin**, N. A Gilotra, J. Trost, S. P. Schulman, and S. Saria, *Using Machine Learning Tools for Early Prediction of Cardiogenic Shock in Patients with Acute Decompensated Heart Failure*, submitted, 2020. [arXiv]

SOFTWARE

microsoft/graspologic (previously **neurodata/graspy**)

Contributor to and maintainer of **graspologic**, an open-source Python package that provides utilities and algorithms for doing statistical analyses on graph- and network-valued data. Notable contributions include latent distribution test implementation and the align module.

alyakin314/lqrt

Author and maintainer of **lqrt**, a Python package that implements the Robust Hypothesis Testing of Location Parameters using Lq-Likelihood-Ratio-Type Test.

Data-Driven Discovery of Models Library - JHU Graph Primitives

One of the primary maintainers of the repository that is JHU's contribution to the D3M's library of selectable primitives that are used as basic building blocks in the automated model discovery process. JHU's primitives are aimed at tackling machine learning problems with graph, or network, inputs, such as Vertex Classification, Community Detection, Link Prediction and Seeded Graph Matching.

AWARDS

Johns Hopkins University

Applied Mathematics & Statistics Prize for Outstanding Master's Research	2020
Applied Mathematics & Statistics Achievement Award	2019
Undergraduate General Honors	2019
Undergraduate Departmental Honors with Thesis, Computer Science	2019
Undergraduate Departmental Honors, Applied Mathematics & Statistics	2019

SKILLS

Programming Languages (in order of proficiency):

Python (including PyTorch and TensorFlow), R, Matlab, Java, C++.

Languages:

English, Russian.

Other skills:

L^AT_EX, Git, Databases (PostgreSQL, BigQuery), Bouldering (Redpoint 6C/V5).
